The New and Improved* Disposable

Masked Laryngeal Airway

The new design has evolved into a superior airway and
The Disposable air-Q is now available in 6 sizes!

* The New, Removable Tethered Connector
  Avoids Misplacing the Connector.

* Removable Color-Coded Connector
  allows intubation through the airway
  tube with any standard ET tubes.

* Integrated Bite Block
  - Easier to place
  - Reinforces the tube
  - Diminishes the need for separate bite block

* Elevation Ramp . . . Facilitates Intubation,
  Directs the ET Tube toward the Laryngeal Inlet.

* Built-up Mask Heel
  for Improved Seal.
New, Disposable air-Q®
Masked Laryngeal Airway

Developed and Designed
by an Anesthesiologist
following 8 years
of clinical research...

for Use with Confidence!

The new and improved design
has evolved into a superior airway providing:

- New Infant Sizes
- Ease of Placement
- Better Seal in “Everyday” Use
- Improved Intubation Success

| * Built-In Bite Block                                                             | • Easier to place  
• Reinforces the tube  
• Diminishes the need for separate bite block | Yes | Some |
| * Mask tip with recessed front that approximates shape of posterior pharynx.       | Easier positioning and improved airway alignment.   | Yes | No |
| * Specially-designed ridges inside mask cavity                                    | Provides lateral stability to help prevent tip from bending backward and improves mask seal. | Yes | No |
| * Keyhole-shaped airway outlet.                                                    | Elevates epiglottis to provide unobstructed access to laryngeal inlet. | Yes | No |
| * Removable, tethered connector for direct access to airway tube.                 | Allows intubation through tube with any standard ET tube. | Yes | No |
| * Facilitates intubation, eliminates duplicate inventories and costly special ET tubes. | Cost-effective. | Yes | No |
